

## **Appearance on the City TV**

**September 23, 2022**

Dina Janković, the project coordinator of the Association for Occupational Health and Safety of Montenegro, appeared on the show "Lice Podgorice" on City TV. At the beginning of the interview, she clarified what Occupational Health and Safety entails and how it is guaranteed and protected by law. The discussion then touched upon the number of workplace injuries, occupational diseases, and work-related illnesses, as well as the lack of a unified system for recording workplace injuries that would contribute to raising awareness about the importance of Occupational Health and Safety (not only for employers and employees but for the entire population).

The conversation particularly focused on the rights of young people in the NEET category (young individuals who are not in regular education, employment, or training) aged 15-30. The promotion of the Youth Handbook was highlighted, which will be distributed to young people in educational institutions, youth organizations, and the Montenegrin Employment Service. Workshops were announced, which the Association will conduct in October and November in vocational high schools in Podgorica, Bijelo Polje, and Nikšić, as well as at technical faculties in Podgorica.
