

Izveštaj – Izrada Priručnika za zaposlene i poslodavce

Od februara 2020. godine, započela je priprema izrade smjernica u vidu priručnika za zaposlene i poslodavce u cilju promovisanja kulture prevencije rizika. Aktivnosti su bile usmjerene na prikupljanju podataka o zaštiti i zdravlju na radu, utemeljenih u Zakonu o zaštiti i zdravlju na radu Crne Gore i podzakonskim aktima. Cilj je bio da se napravi priručnik u kojem bi zaposleni i poslodavci na jednom mjestu mogli da se upoznaju sa opasnostima, štetnostima, a i rizicima na različitim radnim mjestima, te kako ih izbjeći, da ne bi dolazilo do povreda i profesionalnih oboljenja. Akcenat je bio na izradi praktičnog alata, koji će u vidu priručnika na što jednostavniji, ali i slikovitiji način privući pažnju i zainteresovanost zaposlenih i poslodavaca.

Priručnik je poripremljen i odštampan u 500 primjeraka.

Priručnik je podijeljen zaposlenima i poslodavcima u malim i srednjim preduzećima u Crnoj Gori, a budući da je zainteresovanost i zaposlenih i poslodavaca za ovaj priručnik ogromna, Udruženje zaštite na radu Crne Gore planira da u narednom periodu Priručnik odštampa u mnogo većem tiražu.

Report – Development of a Manual for Employees and Employers

From February 2020, the preparation of guidelines in the form of manuals for employees and employers began in order to promote a culture of risk prevention. Activities were focused on collecting data on occupational safety and health, established in the Law on OSH of Montenegro and bylaws. The aim was to create a manual in which employees and employers could get acquainted with the dangers, harms and risks at different jobs, and how to avoid them and not causing injuries and occupational diseases. The emphasis was put on the development of a practical tool, which will attract the attention and interest of employees and employers in the form of a manual, in a simple, but also more picturesque way.

The manual was prepared and printed in 500 copies.

The manual was distributed to employees and employers in small and medium enterprises in Montenegro, and since the interest of both employees and employers for this manual has been huge, the Safety at Work Association of Montenegro plans to print the manual in a much larger circulation in the coming period.
