

## **Guest appearance on the Morning Program of RTCG**

**March 16, 2022**

One of the topics of the Morning Program of RTCG was the protection and health at work of employees. Đina Janković reminded that five serious work-related injuries occurred in Montenegro in just 2.5 months since the beginning of the year, including three fatal incidents and two severe injuries. This serves as a reminder of the seriousness of the situation in this field and the necessity of educating young people, improving workplace safety, and fostering a culture of injury prevention and occupational health.
